EDUCATION

-
- | | |
|--|------------------------------------|
| • Kantipur City College (KCC)—Purbanchal University,
<i>Bachelor of Information Technology (BIT)</i> | Kathmandu, Nepal
2023 – Present |
| • Kathmandu Model College (KMC)
<i>Higher Secondary +2 Science (PCM); CGPA: 3.50</i> | Kathmandu, Nepal
2021 – 2023 |

TECHNICAL SKILLS

-
- **Languages:** Python, JavaScript, HTML, CSS, C++ (OOP), Java (Core), PHP
 - **Frameworks & Libraries:** React, Next.js, Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn
 - **Database & Backend:** MongoDB, MySQL, Node.js, Express.js,
 - **Tools & Platforms:** Git, GitHub, Visual Studio Code
 - **CMS & SEO:** WordPress, On-page SEO, Technical SEO

PERSONAL PROJECTS

-
- **Text2Comic.ai – AI-Driven Text-to-Comic Generator:** Built an end-to-end AI comic generation pipeline that transforms plain text into structured comic strips using GPT-3.5 Turbo for dialogue transformation, Flask for backend processing, and Stable Diffusion for image generation. Engineered a workflow to parse user input into speaker–dialogue pairs, generate scene-aligned images, and overlay speech bubbles using OpenCV and Pillow. Developed an export system that combines generated panels into a downloadable PDF for easy sharing across devices.
 - **Summarify-Utube – AI-Powered YouTube Video Summarizer & Q/A System:** Built an AI-driven YouTube summarizer and Q&A platform using FastAPI that extracts video transcripts, generates multilingual summaries, and answers questions using Groq’s LLM. Integrated Neo4j to construct a knowledge graph for context-aware responses, enabling users to grasp long videos quickly. Delivered a modern responsive UI with voice input, customizable summary styles, dark/light mode, and local history storage using Tailwind CSS.
 - **CareerPilot AI – Career Optimization & Resume Intelligence Platform:** Built a full-stack career optimization platform using Flask, Next.js, React, TypeScript, Tailwind CSS, and shadcn/ui. Integrated Google Gemini 2.5 Flash with LangChain for context-aware resume coaching, cover-letter generation, and interview preparation. Implemented a hybrid NLP pipeline using spaCy and scikit-learn to score ATS compatibility across industries, with responsive UI, dark/light theming, and real-time salary insights.

ACADEMIC PROJECTS

-
- **Ghar Sewa – Household Service Booking Platform:** Designed and developed a service platform connecting household service providers with customers, supporting user registration, service booking, real-time availability checks, and administrative control. Built using HTML, CSS, JavaScript, PHP, and MySQL.
 - **Blood Bank Management System:** Developed a comprehensive desktop system to manage donor records, blood type inventories, and coordinate requests between blood banks and hospitals. Built with Java Swing GUI, JDBC, and MySQL, featuring an intuitive interface for end-to-end blood request handling.

- **Movie Booking System:** Created an interactive seat booking application managing reservations, movie scheduling, ticketholder profiles, and transaction logs, implemented in C++ using OOP principles and file handling.
- **Library Management System:** Developed a lightweight record management tool automating book cataloging, issue tracking, member logs, and return operations, built in C using structures and file I/O.

CERTIFICATIONS AND EXTRA-CURRICULAR

- Microsoft Certified: Security, Compliance, and Identity Fundamentals (SC-900)
